Dear FCC,

I understand the purpose of Net Neutrality, and am extremely angry at the recent decision to repeal it due to the greed of the FCC and Chairman Pai. Do not repeal Net Neutrality.

The repeal of Net Neutrality affects me, as a member of the first truly online generation. The greed of a few will impact the future of many. As a content creator and an engineer, the freedom of the internet allows me to function, survive, and be a productive member of society. This issue means a great deal to me, and directly influences my votes and political donations. I do not know a single citizen who agrees with Chairman Pai's repeal of Net Neutrality, and I hope that my elected officials will fight for their constituents.

Sincerely,  
Julian Shur  
Southern California
